ADSL SERVICES FOR HOME USERS

BASIC HOME UNCAPPED DSL SERVICES

Home packages are provided on the Axxess network. As such, they are subject to Axxess' acceptable use policy. This policy means that our BASIC UNCAPPED packages are subject to protocol throttling and are not recommended for high data users.

CAPPED DSL SERVICES

HARD CAPPED PACKAGES are a usage-based service where the customer determines their own limits. Each user will be setup with the own username, and assigned a particular data limit. When a user's limit is reached, the package will be disabled until the following month.
